

**STAFF REPORT FOR CALENDAR ITEM NO.: 13**  
**FOR THE MEETING OF: June 12, 2025**

**TRANSBAY JOINT POWERS AUTHORITY**

**BRIEF DESCRIPTION:**

Presentation of the draft Anticipated Disadvantaged Business Enterprise (DBE) Participation Level (ADPL) for federal fiscal years 2025-26 through 2027-28 (FFY 2025-28) and public notice of the release of the draft ADPL for a 30-day public review and comment process, and presentation of draft Small Business Enterprise participation goal.

**SUMMARY:**

In accordance with Title 49 of the Code of Federal Regulations, Part 26 (49 CFR Part 26), the TJPA is required to implement a DBE Program to ensure nondiscrimination on the basis of race, color, sex, or national origin in the award and administration of U.S. Department Of Transportation (DOT)-assisted contracts. As part of this program, the TJPA must establish a triennial goal for DBE participation in all new contracts that are planned to be funded with Federal funds.

For federal fiscal Year (FFY) 2025–28, TJPA proposes an Anticipated DBE Participation Level (ADPL) of 4.03%, derived using the two-step methodology outlined in federal regulations. To supplement DBE participation, a separate, program-wide Small Business Enterprise (SBE) target of 3.7% has also been calculated to guide TJPA’s small business participation efforts, although it is not reportable to the Federal Transit Administration (FTA).

On June 06, 2025, the draft ADPL was published for public review and comment for 30 days, after which a final ADPL will be presented to the Board for adoption.

**Development of ADPL Percentage**

As an eligible recipient of federal-aid funding, TJPA is required to comply with 49 CFR Part 26, which states that grantees must establish and implement a DBE program and set triennial DBE participation goals.

TJPA’s proposed ADPL was calculated using a two-step methodology described in 49 CFR Part 26. Step One establishes a base figure for any anticipated new contracts to be awarded in the federal fiscal years 2025-26 through 2027-28 (October 1, 2025 – September 30, 2028). The base figure is derived from the relative availability of DBEs that are ready, willing, and able to participate in these anticipated contracts. Step Two relies on the TJPA’s knowledge of its contracting markets and historical DBE participation to determine if an adjustment to the base figure is needed. The calculation using the prescribed methodology results in an FTA ADPL of 4.03% for FFY 2025-28. This methodology is outlined in Attachment 1. Using a similar methodology, staff calculated a separate SBE participation target of 3.7%. This figure will guide TJPA’s small business engagement efforts across all contracts, regardless of funding source. The calculation of the goal is shown in Attachment 2.

**Race-Neutral Implementation**

The overall DBE goal is typically split into race-neutral and race-conscious components. Race-neutral DBE participation includes any time a DBE wins a prime contract through customary

competitive procurement procedures or is awarded a subcontract on a prime contract that does not carry a DBE contract goal. Race-conscious DBE participation is the portion of the overall goal that focuses specifically on assisting only DBEs, including women-owned DBEs, where a contract's DBE goal is explicitly stated to encourage DBE participation. TJPA will continue to operate a race-neutral DBE program.

### **Public Outreach**

TJPA is a member of the Business Outreach Committee (BOC), a consortium of Bay Area transit and transportation agencies working together to assist DBEs and SBEs. As part of this consortium, TJPA has participated in consultation events explaining the goal setting methodology as required in 49 CFR Part 26. After Board approval, the draft ADPL for FFY 2025-28 will be published on the TJPA website and include addresses to which comments may be sent. TJPA staff will also share the proposed goal and goal setting methodology through the BOC and with previous participants of BOC outreach events. Any comments received will be reviewed and brought to the Board for consideration when the final ADPL is brought for approval at a later Board meeting.

### **RECOMMENDATION:**

Information only: The Final ADPL will be presented for approval at the July Board meeting.

### **ENCLOSURES:**

1. FFY 2025-28 ADPL Methodology
2. FFY 2025-28 SBE Goal Methodology

# **TRANSBAY JOINT POWERS AUTHORITY**

## **FFY 2025-28 ANTICIPATED DBE PARTICIPATION LEVEL (ADPL)**

### **I. INTRODUCTION**

In accordance with Title 49 of the Code of Federal Regulations, Part 26 (49 CFR Part 26), the Transbay Joint Powers Authority (TJPA) implements a Disadvantaged Business Enterprise (DBE) Program to ensure nondiscrimination in the award and administration of federally funded contracts. As part of this program, the TJPA has established a Triennial Goal for DBE participation in all new contracts that are planned to be funded with Federal financial assistance from the United States Department of Transportation (U.S. DOT). A DBE firm is defined as a for-profit “small business concern” that is at least 51 percent owned by one or more individuals who are both socially and economically disadvantaged, and whose management and daily business operations are controlled by one or more of the socially and economically disadvantaged individuals who own it. DBE firms are certified as such through Unified Certification Programs established in each state.

Between October 1, 2025, and September 30, 2028, the TJPA expects to receive Federal funds to support the design and construction of The Portal (Downtown Rail Extension project). Anticipated federally funded contracts primarily fall within the Heavy and Civil Engineering Construction and Utilities subsectors. To accurately assess DBE availability, TJPA refined relevant North American Industry Classification System (NAICS) commodity codes by evaluating individual scopes of work across multiple industry subsectors. Based on this analysis and the two-step methodology outlined in 49 CFR Part 26, TJPA established an Anticipated DBE Participation Level (ADPL) of 4.03% for Federal Fiscal Years (FFYs) 2025-26 through 2027-28 (FFY2025-28).

The TJPA continues to implement a Race-Neutral DBE program. Section IV. describes TJPA’s efforts to encourage DBE participation, including participation in the “Business Outreach Committee,” a consortium of 26 Bay Area transit and transportation agencies that regularly reaches out and provides resources for DBE and SBE firms, as well as maintaining an agency wide SBE program.

### **II. PUBLIC OUTREACH**

TJPA is a member of the Business Outreach Committee (BOC), a consortium of 26 Bay Area transit and transportation agencies focused on outreach and assistance to DBEs and other small companies. The BOC conducted a virtual Consultation meeting on May 7, 2025, and two separate Public Participation meetings on May 7, 2025, and May 13, 2025. The consultation meeting was dedicated to trade groups, minorities, women’s and general contractor groups, community organizations, and other governmental organizations. The focus of the presentation was on the goal-setting methodology and on how to improve outreach and support to DBE firms. The BOC distributed an electronic invitation to over 200 email addresses, which included CBOs, various trade groups, minorities, women’s and general contractor groups, and technical resource groups throughout the Bay Area.

The Public Participation meetings were open to the public and focused on the overall goal setting process, discuss DBE goals proposed by some of the BOC agencies, and answer any questions or concerns.

For all three events, the BOC presented on the background of the DBE program, recipients' role, goal-setting process and methodology, various agencies' contracting opportunities, and time for discussion and questions. Comments and discussion during the public consultation events focused on the goal-setting process, how agencies conduct outreach and provide support to DBE firms, and resources available to DBEs.

### **III. METHODOLOGY**

The methodology to calculate an agency's DBE participation target is a two-step process described in 49 CFR Part 26. Step One establishes a base figure for the anticipated new federally-funded contracts to be awarded during FFYs 2025-26 through 2027-28. As part of this program, the TJPA must establish a triennial target for DBE participation in all new contracts that are planned to be funded with Federal funds, so this calculation has been done for contracts expected to be awarded between October 1, 2025, and September 30, 2028.

The base figure is derived from the number of the relative availability of DBEs that are ready, willing, and able to participate in these anticipated contracts. Step Two relies on the agency's knowledge of its contracting markets and historical DBE participation to determine whether an adjustment to the base figure is warranted. The calculation using the two-step methodology results in an FTA ADPL of 4.03% for FFY2025-28 for the TJPA. This methodology, rationale and calculations are outlined below.

#### **Step One Process: Census Bureau Data and DBE Directory**

The initial step in developing an ADPL is to determine the market area for consultants and contractors who have demonstrated an interest or are anticipated to participate in TJPA contracts. The counties in the TJPA's market area consist of the nine (9) Bay Area counties:

- Alameda County
- Contra Costa County
- Marin County
- Napa County
- San Francisco County
- San Mateo County
- Santa Clara County
- Solano County
- Sonoma County

The Salesforce Transit Center is a multi-modal transportation hub serving the San Francisco Bay Area Region, which is made up of the nine counties above. It serves as a hub for the transit systems from the surrounding counties, bringing thousands of workers into San Francisco daily. The Metropolitan Transportation Commission (MTC) — the state designated regional transportation agency — defines its transportation planning and financing area as the nine-county Bay Area, and California Department of Transportation (Caltrans) District 4 is also made up of the nine-county Bay Area. MTC and Caltrans are funders of the Transbay Program, and the nine

counties are represented in some fashion on the TJPA Board, each with an expectation of project benefits including work on the project during the design and construction phases. The nine-county San Francisco Bay Area is the most appropriate market area for TJPA to use in its goal-setting methodology.

Secondly, the work categories must be determined for the anticipated contracts. In the period between October 1, 2025, and September 30, 2028, the TJPA anticipates receiving Federal funds to advance design and construction of several components of The Portal, also known as the Downtown Rail Extension project. All the federally funded contracts anticipated to be awarded in the period fall under the Heavy and Civil Engineering Construction subsector, other than the Advance Works contracts which fall under the Utilities subsector. To further refine the list of potential DBE firms, the TJPA Portal team evaluated each proposed scope of work for the anticipated contracts individually to expand the list of North American Industry Classification System (NAICS) commodity codes used to find available DBE firms. Through this evaluation, the TJPA considered the Transportation and Warehousing, and Professional, Scientific, and Technical Services subsectors, along with narrowing down the Heavy and Civil Engineering Construction and Utilities subsectors to get the targeted list.

To identify DBE firms ready, willing and able to work in the TJPA's market area, the TJPA used California's United Certification Program database of DBE certified vendors.<sup>1</sup> The ratio of DBE firms to non-DBE firms was calculated by dividing the number of certified DBE firms by the total number of firms found in the same market area according to the US Census database. Finally, the Step One Base Figure results from multiplying the DBE ratios for each work category by the estimated dollar amount for that category and dividing the sum of those numbers by the total dollar amount estimated to be awarded.

$$\text{Step One Base Figure} = \frac{\text{\# of ready, willing, and able DBEs}}{\text{\# of all firms, ready, willing, and able (including DBEs and non-DBEs)}} = 2.27\%$$

The Step One Base Figure, weighted by type of work to be performed, is 2.27%.

### **Step Two Process: Adjustment to the Base Figure**

The purpose of the Step Two analysis is to determine if an upward or downward adjustment to the base ADPL is justified, based on relevant evidence available to TJPA. The TJPA's DBE participation history assists in determining whether an adjustment to the Step One Base Figure is warranted.

TJPA established a DBE program in 2006 and has been tracking awards and payments to DBE firms since the start of the program. DBE participation has changed over time as the award and payments for the design and construction of the Salesforce Transit Center progressed. Between FFY 2007-08 and FFY 2021-22 the TJPA had a median ADPL of 8.3% and a median award to DBE firms of 5.8%. This period included significant design engineering and construction contracts, similar to the contracts anticipated to be awarded in the FFY 2025-28 period, however, in more recent fiscal years most contracts have been either consultant contracts or related to

---

<sup>i</sup> <https://californiaucp.dbesystem.com/>, visited on May 15, 2025

operations. Given that past participation is one of the most reliable factors to adjust the base figure, the TJPA is using the median DBE attainment for FFY 2007-08 and FFY 2021-22 to adjust its draft ADPL for FFY 2025-28 to 4.03%.

TJPA considered using more recent DBE participation attainment but the nature of contracts awarded in the most recent fiscal years was very different than the contracts anticipated to be let in the FFY 2025-28 period. TJPA also considered goals for other U.S. DOT recipients in similar market area but found that TJPA's own experience was a more relevant reference point.

#### **IV. RACE NEUTRAL/RACE CONSCIOUS**

The overall DBE goal is typically split into race-neutral and race-conscious components. Race-neutral DBE participation includes any time a DBE wins a prime contract through customary competitive procurement procedures or is awarded a subcontract on a prime contract that does not carry a DBE contract goal. Race-conscious DBE participation is the portion of the overall goal that focuses specifically on assisting only DBEs, including women-owned DBEs, where a contract's DBE goal is explicitly stated to encourage DBE participation. TJPA will continue to operate a race-neutral DBE program.

TJPA continues to take affirmative steps to achieve DBE participation through implementation of its separate Small Business Enterprise (SBE) Program to place binding goals on contracts, in order to foster small business participation. The TJPA shall use set-asides for small business enterprises as appropriate in the administration of its SBE Program. Contractors must demonstrate good faith efforts to meet SBE goals when they are placed on contract opportunities. TJPA accepts certifications from the following programs in its SBE Program:

- California Department of General Services (DGS) Small or Disabled Veteran Business Enterprise S/DVBE
- Any state's Unified Certification Program DBE
- Contract Management Division (CMD) of the Office of the City Administrator L/M/WBE

As mentioned in Section II., the TJPA participates in the Business Outreach Committee (BOC), a working group of San Francisco Bay Area transit and transportation agency staff focused on outreach and assistance to DBEs and other small companies, and attends outreach events regarding contract opportunities, participates in networking events, holds pre-proposal/bid meetings/conferences to provide networking opportunities on all procurements, works on contract unbundling to provide SBE opportunities as appropriate, and participates in certification and other business assistance workshops hosted by the BOC.

The TJPA will follow the procedures in §26.109 regarding availability of records, confidentiality of information on complainants, cooperation, intimidation and retaliation.

The TJPA will safeguard from disclosure to third parties information that may reasonably be regarded as confidential business information, consistent with Federal, state, and local law.

Participants in TJPA's DBE Program are required to cooperate fully and promptly with compliance reviews, investigations, and other requests for information. Failure to do so shall be a ground for appropriate action against the party involved.

Participants in TJPA's DBE Program will not intimidate, threaten, coerce, or discriminate against any individual or firm for the purpose of interfering with any right or privilege secured by §26.109, or because the individual or firm has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing. Failure to comply with this part is a violation.

### **Small Business Enterprise Goal Calculation**

TJPA will continue to seek SBE participation to the maximum extent possible on contracts, regardless of funding source, and consequently has also calculated a program-wide SBE target for agency reference of 3.7%. The same methodology is used to calculate the SBE goal.

The Step One base figure was derived from reviewing the relative availability of SBEs for the upcoming contract opportunities. TJPA staff reviewed California's Small Business certification program database<sup>ii</sup>. The availability percentages are multiplied by the estimated dollar amount for that category, and the sum of those numbers is divided by the total dollar amount estimated to be awarded.

$$\text{Step One Base Figure} = \frac{\text{Sum of (SBE Ratio*Individual Contract Amount)}}{\text{Total Contract Amount}} = 3.8\%$$

Step Two relies on the agency's knowledge of its contracting markets and previous history of SBE participation to determine what adjustment to the base figure is needed. This step also acknowledges that there is duplication amongst the databases as firms may hold more than one type of certification, and "apples-to-apples" comparison across the databases is difficult, as the California Department of General Services does not use NAICS codes to categorize businesses but instead utilizes key words.

Where there is previous participation by SBEs, the median percentage from that past participation is averaged with the Step One Base Figure for that particular contracting category. This results in an adjusted availability percentage that is included in the calculation. TJPA anticipates contracting for various services in the next several years and has thus made an adjustment based on past SBE participation of existing contracts for work categories that are anticipated.

$$\text{Step Two SBE Target} = \frac{\text{Sum of (Adjusted SBE Ratio*Individual Contract Amount)}}{\text{Total Contract Amount}} = 3.7\%$$

The overall SBE goal is therefore 3.7%.
