Park Programming Highlights

Harvest Fest 2026 brought over 500 people to the park.

Landscaping Updates

We recently initiated a plan to trim back some overgrown areas, while also re-seeding some grass areas affected by pests. Our landscape architect and landscaping teams are working with plant healthcare specialists to actively inspect all plants, and test soils to proactively ensure all pests are abated.

In Spring 2027, we'll begin replanting accordingly to fill in empty areas with new plants, ensuring the park stays beautiful.

Removed a Leucadendron (Silver tree) which died due to a severe case of Phytophthora. Tree was also "overgrown" and leaning over the side of the railing.

Added fresh soil and re-seeded, after abating wireworms and repairing irrigation.

Planters along Natoma have been repaired and filled in with rosemary and catmint, both of which sprout flowers, deter pests, and are hearty enough to thrive in San Francisco's climate.
